

Take an Active Approach To Reduce Risk in Your Supply Chain

ReposiTrak

Trusted Brand Protection

YOUR SUPPLY CHAIN IS LESS SECURE THAN YOU THINK

As regulatory and tort risk continues to increase for supply chain participants, it's now more important than ever to ensure their manufacturing operations and documentation are in order to prove compliance. Other systems depend on the voluntary self-management of your suppliers...however that is a passive approach. Without constant contact and follow up, your suppliers will fall out of compliance, and increase your brand risk. Results from thousands of vendors new to ReposiTrak prove that most vendors are not compliant on even the most basic documents. And honestly, many of these vendors are likely servicing you.

- 65% have non-existent or expired *Liability Insurance*
- Nearly 11% of insurance minimum requirements are not met
- 36% of *Hold Harmless* agreements are missing or expired
- 75% of required *Third Party Audits* are missing or expired
- 29% of suppliers' *Letters of Continuing Guarantee* are missing or expired

REPOSI TRAK® MARKETPLACE

Have a few bad actors?

We've opened up our database of compliant suppliers for you to find replacement vendors, or even new vendors to improve your assortment.

From within the app, you can request a sample, negotiate terms, initiate a purchase order, or even expedite your new supplier's on-boarding to your system by leveraging the item data already stored in ReposiTrak.

WHAT IS REPOSI TRAK? ReposiTrak provides retailers, wholesalers and suppliers with a robust solution to help protect their brands and comply with government regulations, such as FSMA. There are two components:

- **Compliance Management** - a one-stop solution for automating the management of and importantly, confirming compliance of required documents and regulatory records. The solution receives, stores and shares documentation; and generates dashboards and alerts for missing, expired or inaccurate records.
- **Track & Trace** - quickly identifies the supply chain path taken by a product in the event of a product recall. It can reduce the risk in the supply chain by identifying backward chaining sources and forward chaining recipients of any product or ingredient.

THE REPOSI TRAK DIFFERENCE?

- **We Take An Active Approach** - ReposiTrak combines a web-based solution with an in-house team to speed results. Our team reaches out to unresponsive suppliers and "nags" them to correct non-compliance issues.
- **Exclusive Supplier SQF Certification Status Alerts** - ReposiTrak has partnered with SQFI to power its audit results database. We're the first to know, so you are the first to know if one of your supplier's SQF certification has been suspended or withdrawn.
- **We Confirm Compliance** - ReposiTrak reads inside uploaded documents and compares contents vs. requirements to detect inaccuracies and/or misrepresentation. It is far more than an electronic storage box.
- **ReposiTrak Works!** - The combination of our technology and dedicated team is proven to improve supplier non-compliance by more than 70% during their first six months on ReposiTrak.
